

## Poker Rules Document

1. Hand Rankings: Royal Flush is the highest, followed by Straight Flush, Four of a Kind, Full House, Flush, Straight, Three of a Kind, Two Pair, One Pair, High Card.

2. Betting Strategy: With a Flush or higher, bet aggressively. With a Pair or High Card, consider folding if opponents bet high. For Two Pair, raise moderately.

3. Bluffing: Bluff only when you have a 70% chance of opponents folding, based on their past behavior. Avoid bluffing with a High Card hand.

4. Position Strategy: If you're in a late position (e.g., dealer), you can play more hands like One Pair. In early positions, play only strong hands like Flush or better.

5. Pot Odds: If the pot odds are above 20%, call with a Straight or Flush draw. If below 10%, fold unless you have a strong hand.
